MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Safety Policy

1. Our first priority in this command is safety, both in the workplace and community. Maintaining low accident rates and complying with safety standards projects us as a highly professional organization. In view of our mission to support and maintain APG's training and testing customers, conservation of our resources is particularly essential. Our position has always been one of high standards and excellence in mission accomplishment. Therefore, we must set the example for everyone else.
2. The safety of our people must always be the primary consideration in everything we do. I am ultimately responsible for the safety and effective operation of this command. However, all levels of leadership and management have safety and personal well-being as an inherent responsibility. You and I must be committed to maintaining a safe and healthy workplace for all.
3. Each of us is responsible for our own personal safety, both on and off duty, and responsible for the safety of those around us. Written safety requirements, personal involvement in safety efforts, and attention to detail, all serve as strong endorsements to safety and speak volumes on our position as a team and professional organization. So, do the right thing, do things by the book - take care of yourself and take care of each other. A safe Army conserves its most precious resource – our people.

JOHN T. WRIGHT
Colonel, OD
Commanding
